

Fibrox Technology LP FACT SHEET

Fibrox™ Technology LP History

Founded in the early 1990s by the Hampson family in Thetford Mines, Quebec, Canada, Fibrox Technology LP is a producer of high purity mineral fiber products. Starting out with a patented process for the production of fiber and in-house expertise, the company has grown tremendously over the years, steadily carving its own market niche as a manufacturer of a range of granulated and specialty mineral fibers, as well as paper products. The company owes its success to an unwavering commitment to product and service quality, and a sustained drive to innovate to meet changing needs of the market and its customers.

Products and Uses

These high fiber content products are used in a variety of industrial and commercial applications – including thermal insulation, high temperature gaskets and seals, composite reinforcement, friction materials, refractory, coatings, paints, caulk and sealants and horticulture mediums.

Specialty Fibers

- Fibrox 300 HD
- Fibrox 030
- Fibrox 300MX
- Fibrox 100FC
- PMF Fiber 204
- Fiberwear CG
