**FOR IMMEDIATE RELEASE**

**Fibrox Technology LP Receives UL Certification on Product Line**  
*Fibrox 300 Product Used in Spray Wool and Acoustical Installations*

MILLWOOD, WV (July 27, 2015) --- As part of an ongoing effort to broaden the markets for its mineral wool products, Fibrox Technology, LP, recently received certification from Underwriters Laboratories, LLC for their Fibrox 300 product.

The product, sold under the private label, Dendamix, is used in spray wool applications for acoustical installations and fire-proofing sold by Fibrox customer American Sprayed Fibers Inc.

“Receiving this UL certification is just one of the ways that we work with our customers to provide the products they need to their exact specifications,” says Fibrox President Russ Craig. “Additionally, having this certification enables us to work with potential customers who require the type of testing and investigation UL does for components to their products.”

Manufactured in Millwood, West Virginia, Fibrox 300 is made by melting by-product slags in a state-of-the-art electric arc furnace. Then, through a complex process, the molten product is spun into clean, synthetic mineral fibers that boast a versatile temperature operating range. An excellent alternative to ceramic refractory, glass, aramid and other mineral wool products, Fibrox 300 is used in chimney insulation, high temperature gaskets, composite reinforcement applications (friction materials, coatings, FRP, etc.), asphalt reinforcement, refractory products (high temperature paper, blankets and vacuum-formed shapes), soil conditioning and hydroponics.

UL is a global independent safety science company with more than a century of expertise innovating safety solutions from the public adoption of electricity to new breakthroughs in sustainability, renewable energy and nanotechnology. Dedicated to promoting safe living and working environments, UL helps safeguard people, products and places in important ways, facilitating trade and providing peace of mind.

## **Fibrox Receives UL Certification/2**

Fibrox Technology LP is a manufacturer of technical grade and high purity mineral fiber products. Founded in the early 1990s by the Hampson family in Thetford Mines, Quebec, Canada, Fibrox produces a range of commodity and specialty mineral fibers used in a variety of industrial and commercial applications including heat shielding, high temperature gaskets and seals, thermal insulation, acoustic insulation, fire protection barriers, chimney insulation, composite reinforcement applications, refractory products (high temperature paper), mat and vacuum formed shapes, horticultural products, asphalt reinforcement (SMA) and fire logs for gas fireplaces. Fibrox products are sold throughout the world by a dedicated group of distributors and agents. For more information, call 604-262-6782 or visit [www.fibrox.com](http://www.fibrox.com).
